Pirouette® Window Shadings

With a sheer face fabric to let light in; rotate attached soft fabric vanes to keep light out

PIROUETTE®

Window Shadings

Features & Benefits

- **Unique design** — soft horizontal fabric vanes attached to a single sheer backing allow for enhanced views to the outside and full beauty of the fabric appearance to the inside.
- **Innovative operation** — the revolutionary Invisi-Lift™ system suspends the shading's soft vanes for variable light control.
- **Versatile functionality** — a single operating cord, hand-held Platinum™ remote or wireless wall switch allows shadings to be closed for privacy, adjusted for precise light control and view-through, or completely open by retracting into the headrail.

Signature S-Vane™ transform the look of a room by changing the quality of exterior light

Product view - Shading

Features & Benefits

- **Unique construction** — soft fabric vanes are suspended between sheer fabric facings.
- **Soft, stylish function** — vanes tilt for precise, variable light control and privacy.
- **Daytime privacy** — two sheer facings obscure the view into the home while still providing a soft, diffused view of the outside.

Transform harsh direct sunlight into soft remarkable beauty while maintaining a clear view-through.

VENETIAN
Blinds

VENETIAN

Blinds

Venetian Blinds

Firstly invented by Hunter Douglas Group in 1946

VENETIAN

Blinds

Features & Benefits – Heat Control

Thermostop®

- Thermostop strip is based on a slat, which has special coating on the concave side of the strip, giving an emission of heat radiation 3 times lower.
- Emission value for normal painted slat is 90% - with Thermostop, it is only 30%
- Slating material increases thermal resistance in cold days and decreases inside heat transfer in warm days

EOS Drapery System

Features & Benefits

- Quiet & smooth
- Hassle free installation
- Operates drapery up to 50 kg
- Variety of control options
- Manual control option for power failure
- Applicable for straight & curved track
- Intelligent motor control with safety stop

EOS Drapery System

Components

Lite -Track: Quite & Reliable

Voltage	AC 90/240V 50Hz/60Hz
Power	50W
Torque	1.2 Nm
Line speed	10cm/s
Rated speed	100rpm
Track length	Maximum 12m
Tack size (W x H)	33mm x 23mm
Motor size (L x W x H)	85mm x 50mm x 365mm
Load capacity	50kg
Min radius of curved track	300mm

Motor | HD60D

- Built in receiver
- Ferroelectric integrated
- Dry contact integration
- Load capacity 50 kg

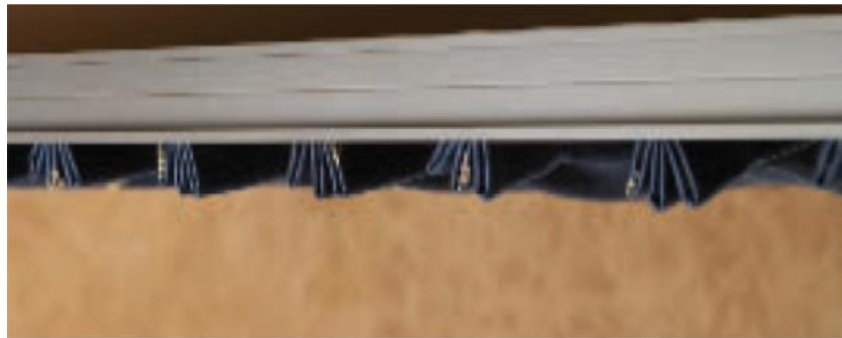

- System running with noise below 34dB.
- Draperies can be controlled manually in case of power loss.
- Pull to start function.
- Motor with 2 speeds; soft start then speed up.

EOS Drapery System

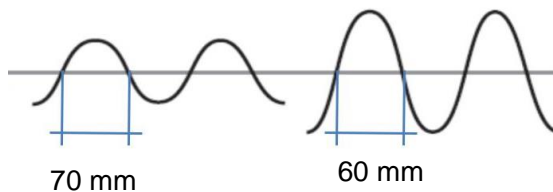

Drapery Folding

Pinch Pleat

Pins on the back of the drape are simply looped through the carries on the track when installed.

Ripple Fold

Drape is constructed with snap tape that allows the drape to be snapped directly to auxiliary carries on the track. .
