Possibilities are  
endless...

# Ball Specifications

The chain is described by 3 factors:

- Diameter (i.e coverage)
- Style
- Finish / Material

# Diameters

**24.26 mm**  
**0.96"**

**5/8" (15.875 mm)**

**21.21 mm**  
**0.84"**

**1/2" (12.7 mm)**

**3/8" (9.525 mm)**

**19.05 mm**  
**0.75"**

**5/16" (7.937 mm)**

**17.91 mm**  
**0.71"**

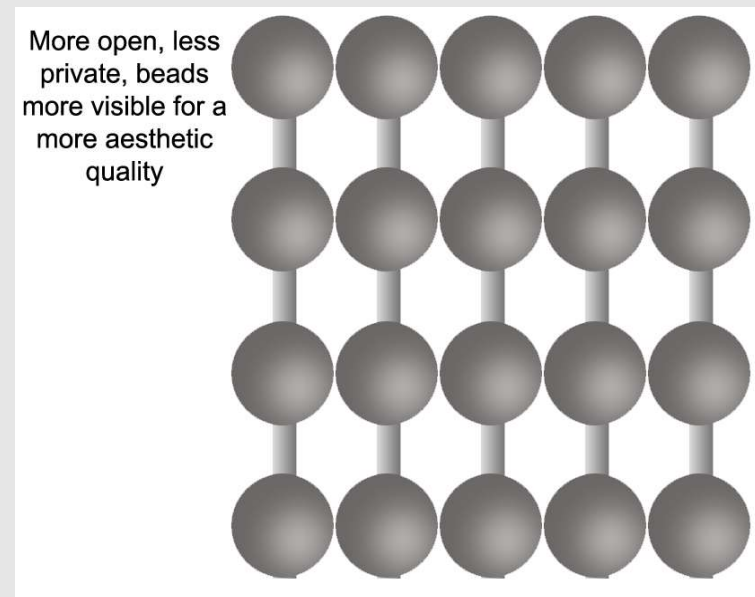

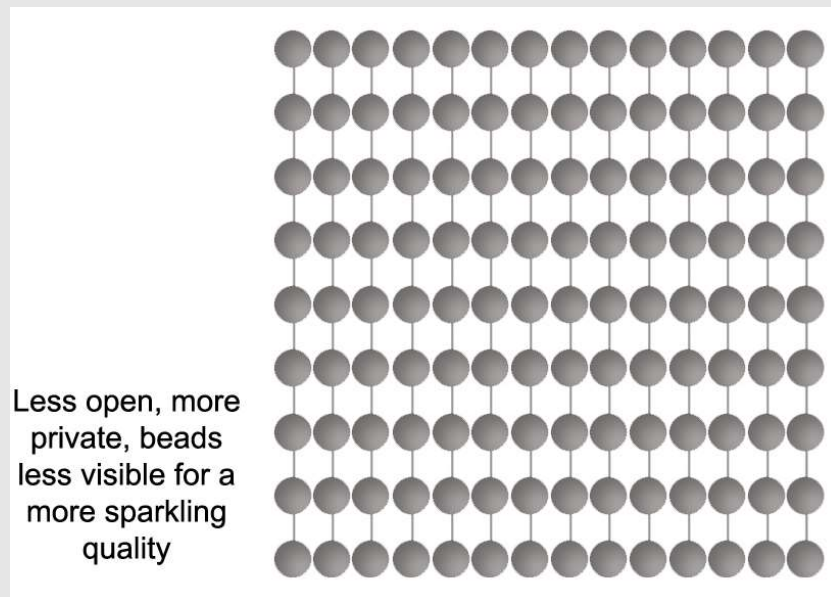

**1/4" (6.350 mm)**

**3/16" (4.762 mm)**

# Coverage

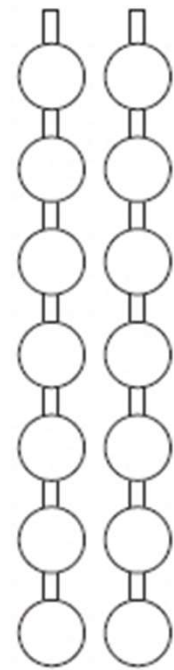

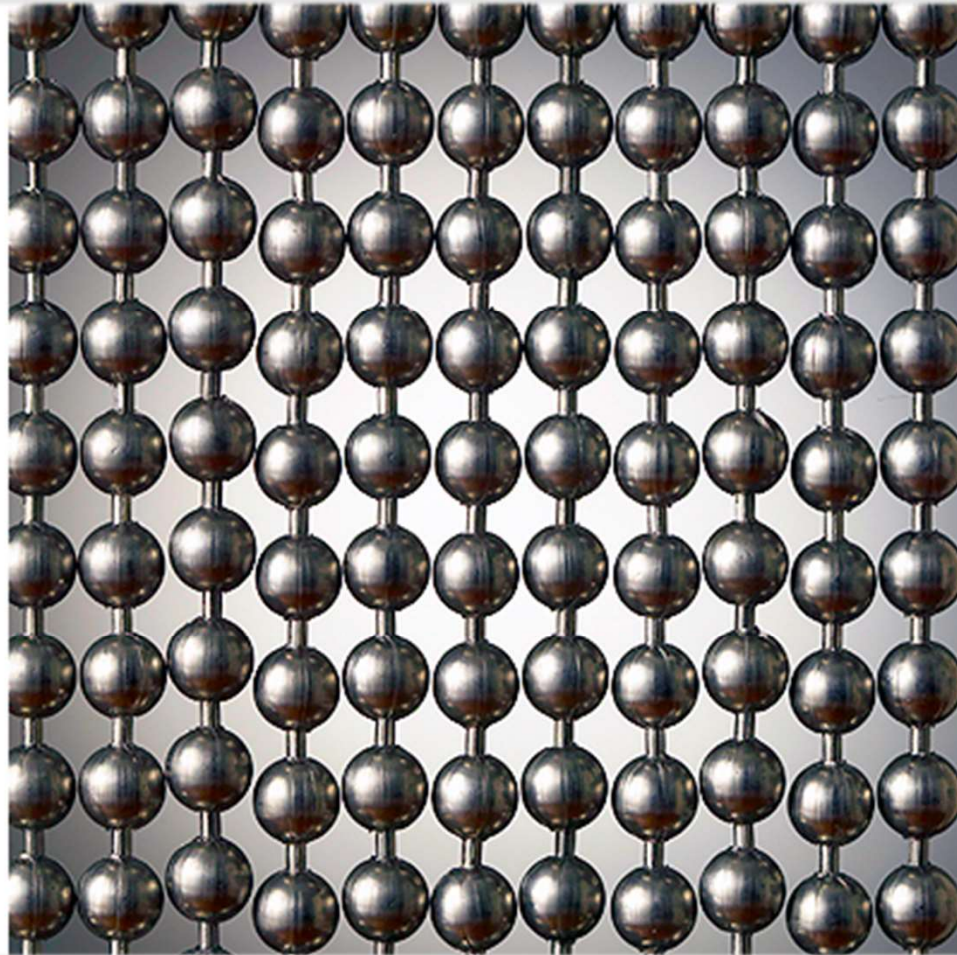

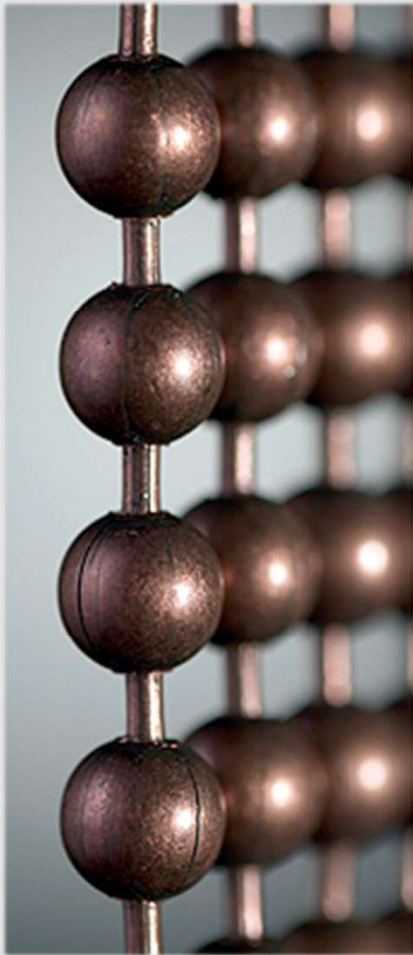

- Smaller diameters will offer denser coverage (more privacy)
- Larger diameter will naturally have more openness
- Ball Spacers – allows for 50% coverage

# Styles

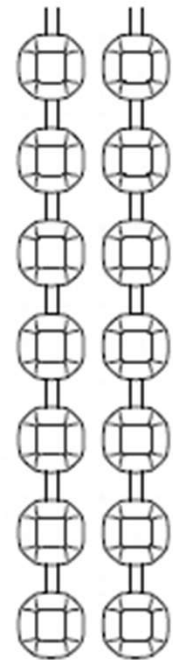

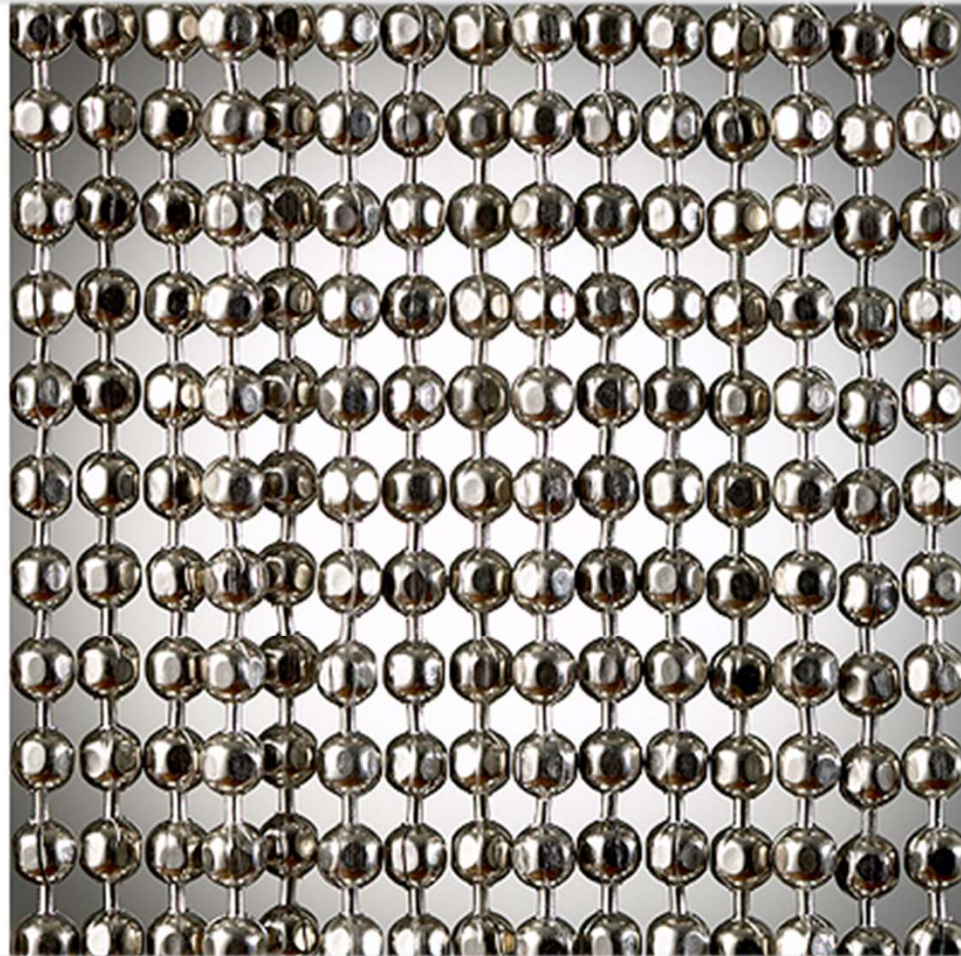

Offering in 3 styles...

# Styles : Round

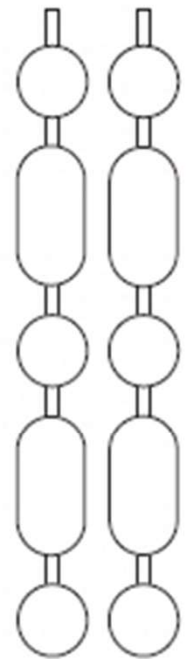

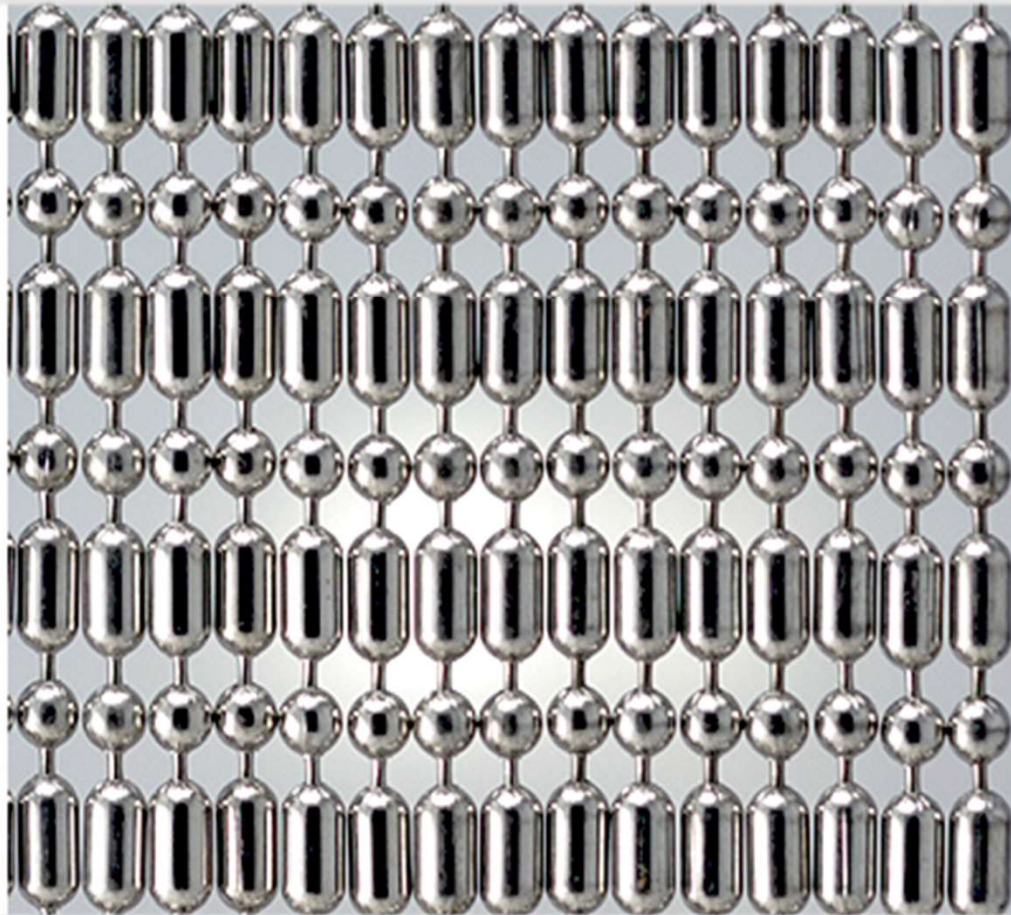

# Styles : Faceted

The faceted style enhances the light reflection and sparkle

# Styles : Ball-Bar

# Finishes

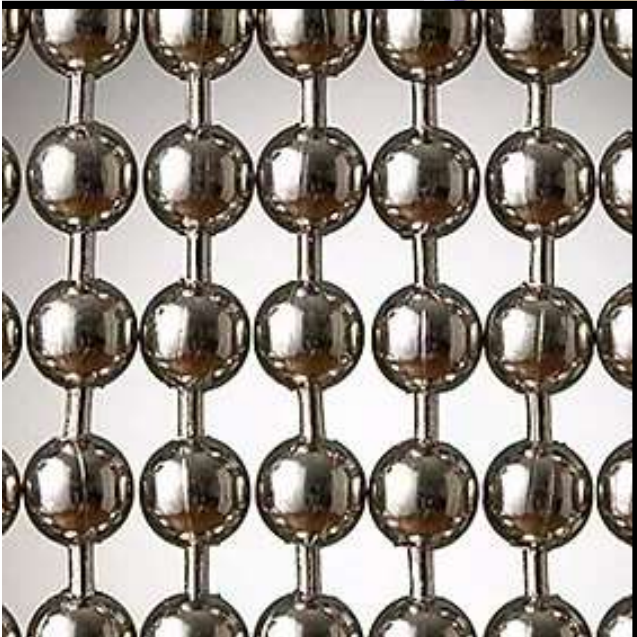

Offering of full range of finishes

If plated finishes do not meet your colour requirements, we have ability of Powder Coat to any colour in the RAL colour spectrum

## Nickel Plated Steel

- Highly polished, reflective, silver “chrome” finish
- Available over steel or brass base
- Excellent choice when used in combination with lighting effects

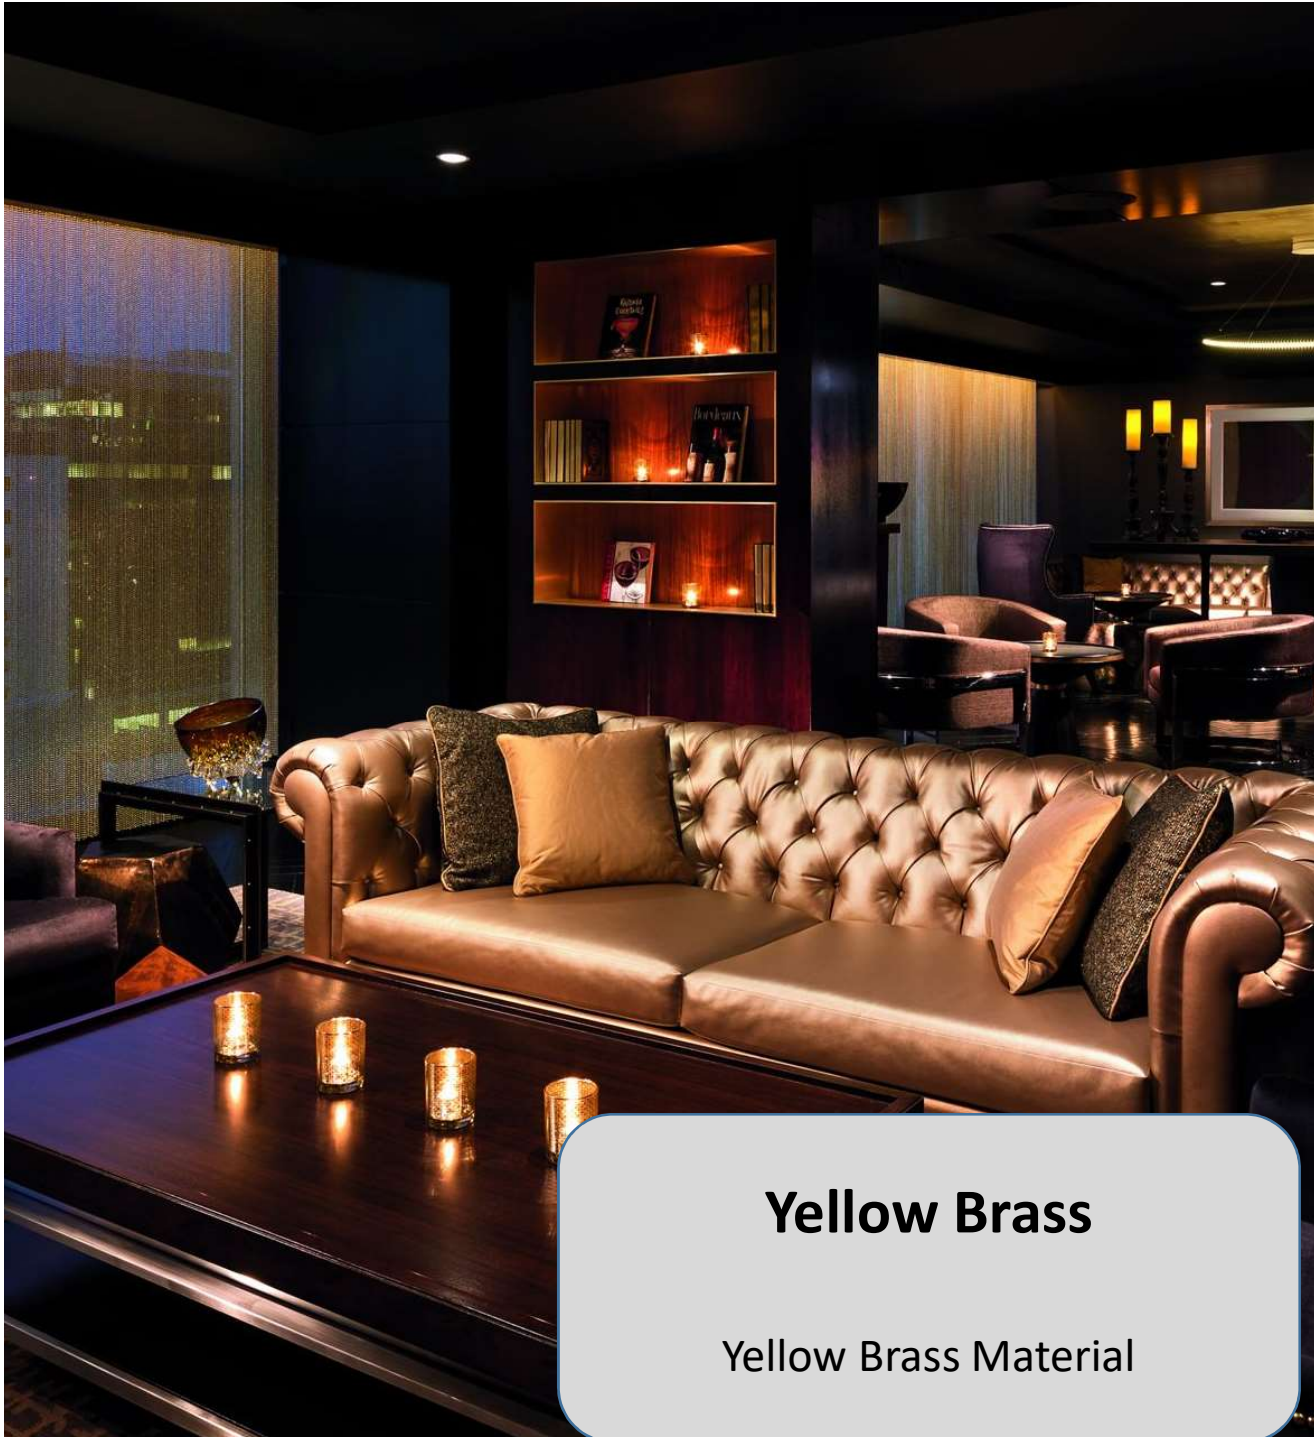

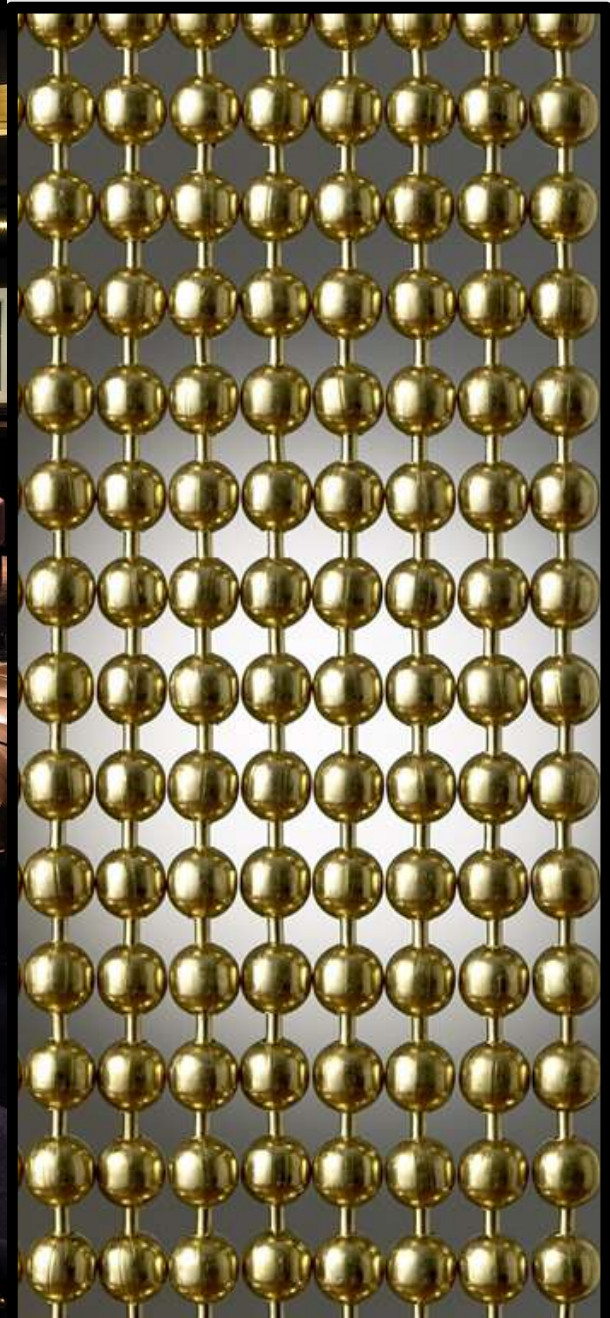

## Brass Plated Steel

Brass finish over a steel base

**Yellow Brass**  
Yellow Brass Material

## Aluminium

- Excellent for exhibits or events, the aluminum chain gives a polished look but with less than 1/2 the weight of steel or brass based chain
- The aluminum chain can be powder coated as a light weight option

## Stainless Steel

- A polished steel grey finish
- The most durable of finishes is the best option for any applications outdoors
- Clean silver cast, great option for salons, spas, and patios

## Antique Finishes

- Dungeon, Mystic Red and Medieval Brass are available over a steel or brass base

## Mystric Red

- Antique Copper Plating
- An organic red patina shows strength and elegance for an interior that seeks design versatility

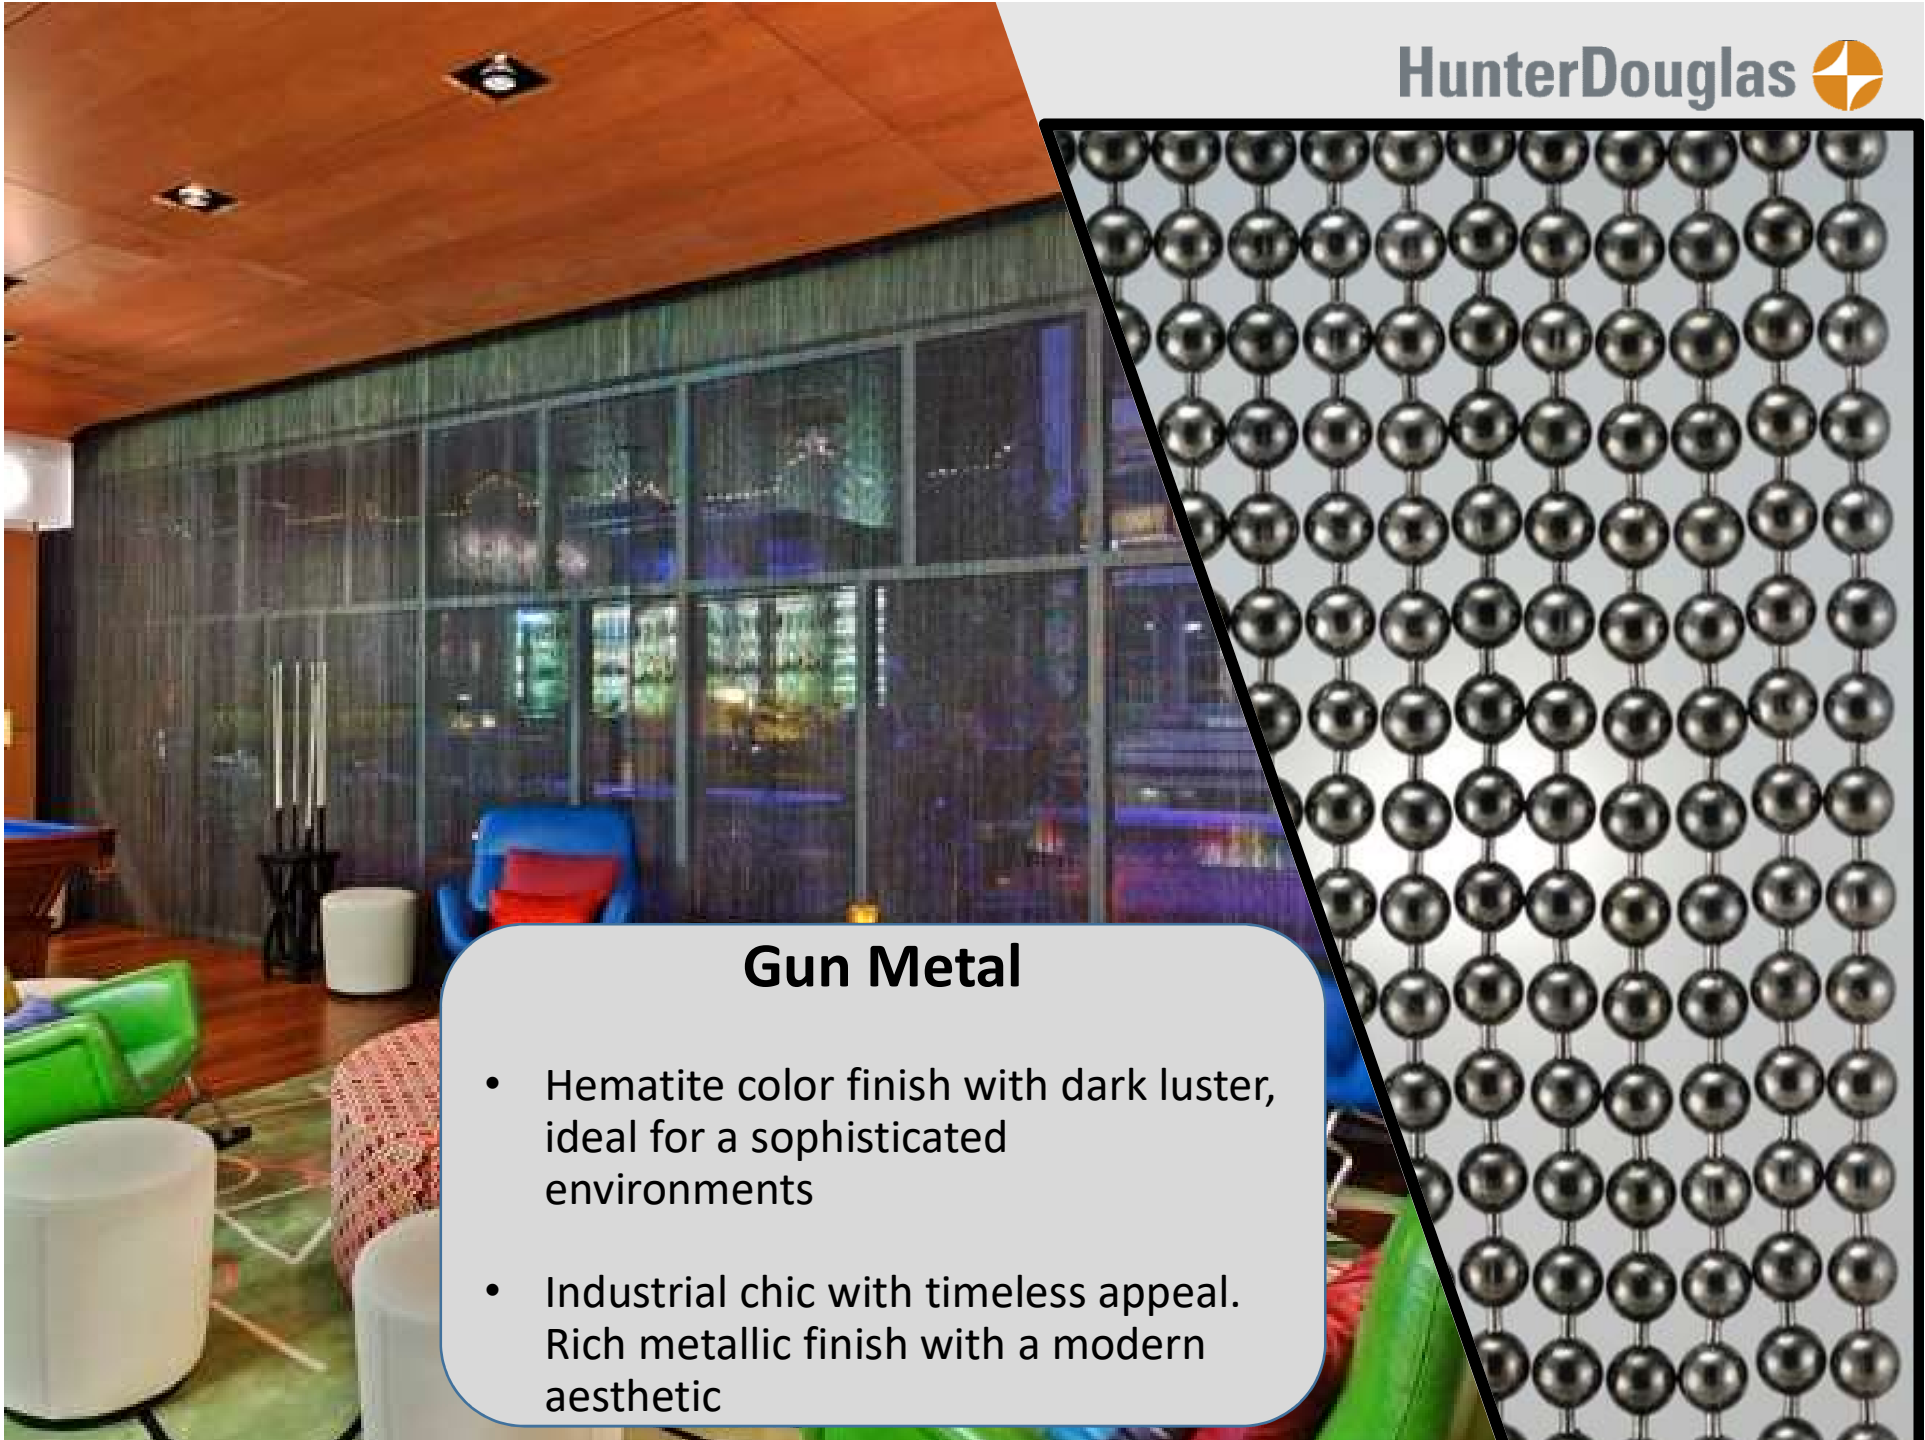

## Dungeon

- Antique Zinc Plating
- Wrought iron feel of the plate adds visual muscle and weight to any environment

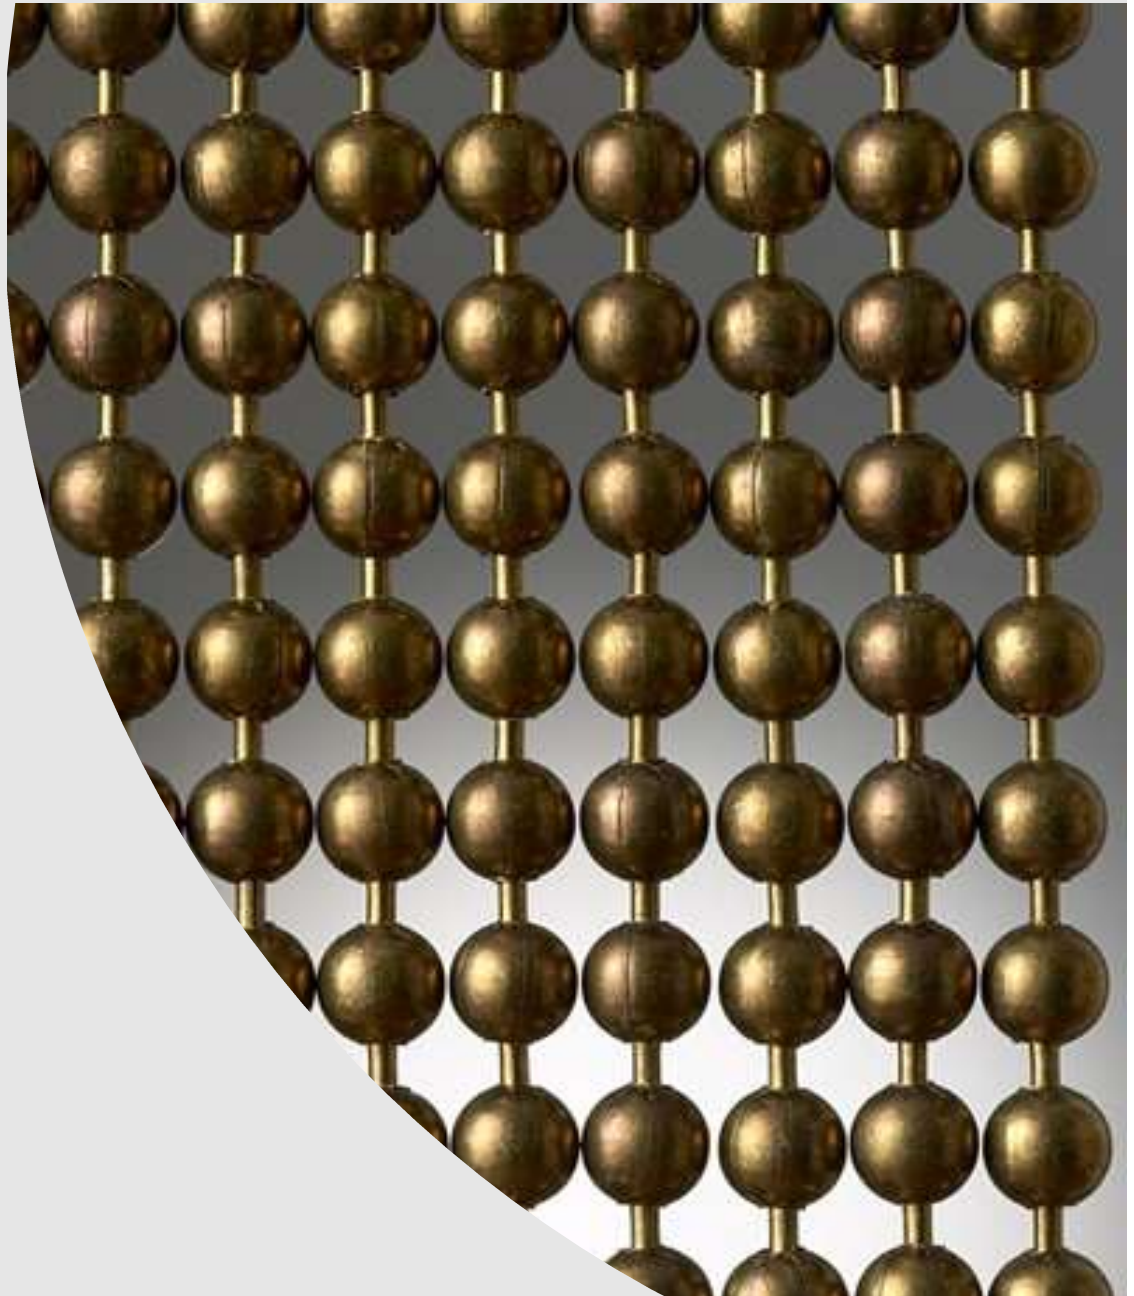

## Gun Metal

- Hematite color finish with dark luster, ideal for a sophisticated environments
- Industrial chic with timeless appeal. Rich metallic finish with a modern aesthetic

## Antique Brown

- Antique Yellow Brass
- Subtle earth tone, perfect for matching deep shades in indoor setting

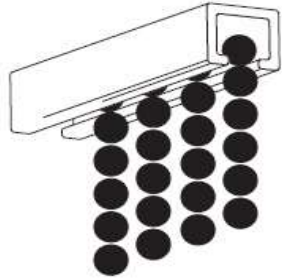

# Tracks

- The track is mounted by drilling directly through the profile or flange
- The last ball of each strand is then inserted into the channel

# Tracks

## Single Track

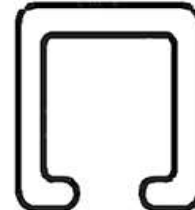

**ST-1**

for 3/16" and 1/4" diameter beads

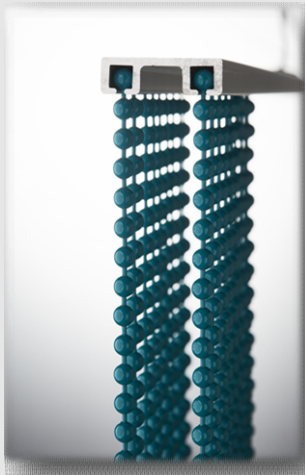

**ST-2**

for 5/16" and 3/8" diameter beads

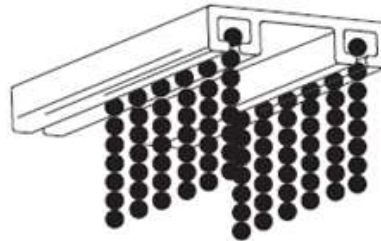

**ST-3**

for 1/2" and 5/8" diameter beads

## Double Track

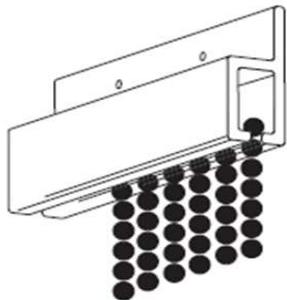

Our double-track was developed to allow for higher density of coverage in your designs. The two rows of chain also open additional possibilities to mix styles and finish of chain to create even more interest.

**DT-1**

for 3/16" and 1/4" diameter beads

## Wall Mounted Track

Giving you more mounting options to expand your design imagination, the wall-mounted track can be used in situations where a standard ceiling mount may be ideal.

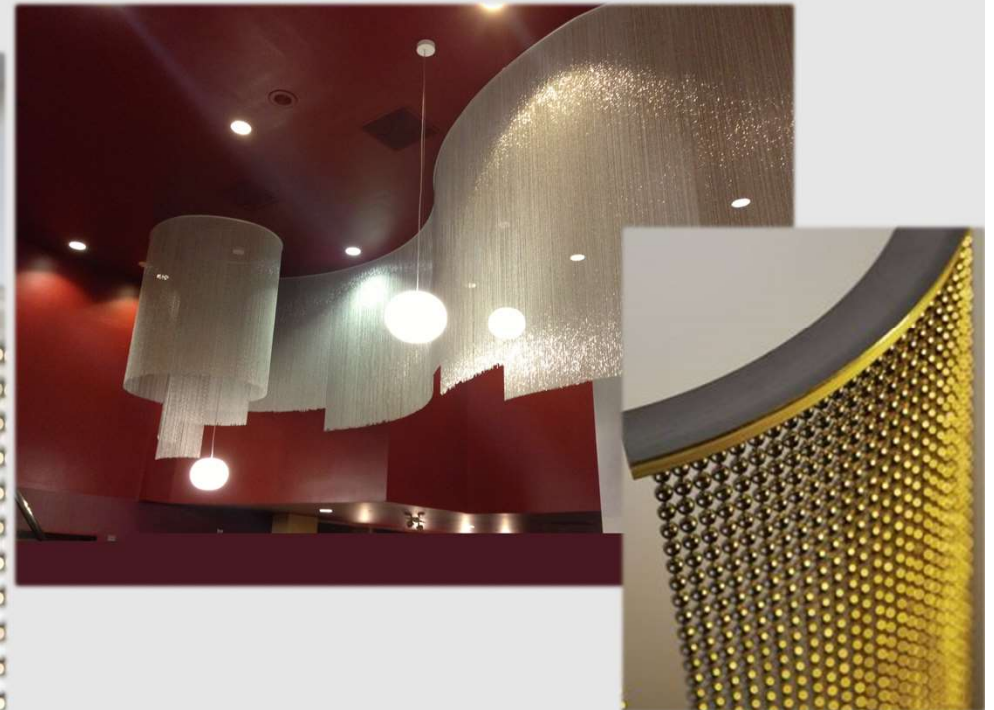

**WT-1**

for 3/16" and 1/4" diameter beads

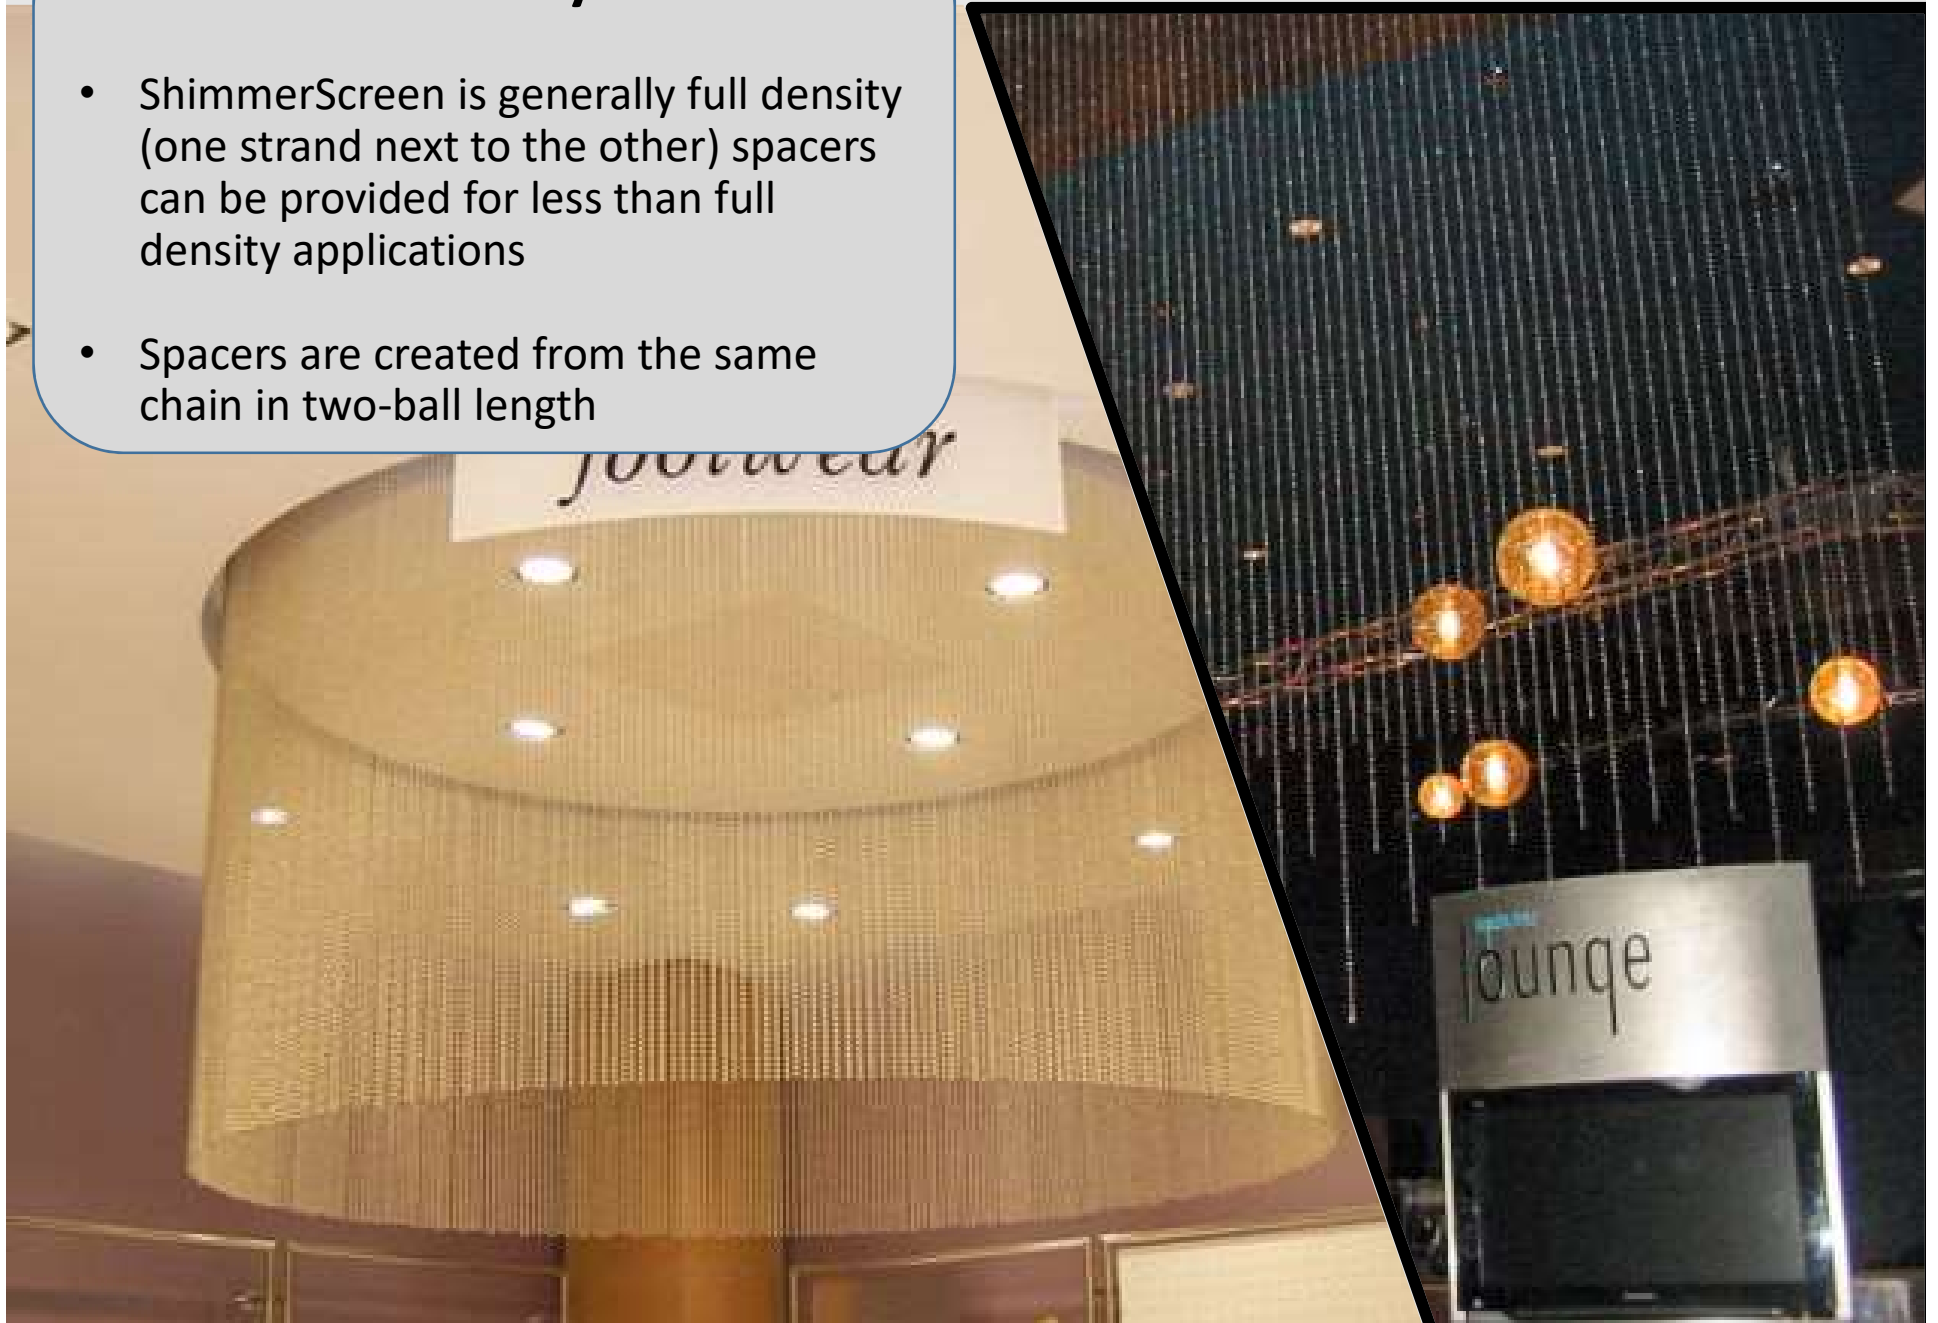

# Curved Track

ShimmerScreen track can be custom curved to your specification. Create arcs, arches, circles, "S" curves and more. We are happy to review your drawings, CAD file or template to make your vision a reality.

## Density

- ShimmerScreen is generally full density (one strand next to the other) spacers can be provided for less than full density applications
- Spacers are created from the same chain in two-ball length

## Patterns

Finishes, Styles, and Diameters can be mixed to create patterns or texture

**Trimming**

**Tie - Backs**

# FAQs

- What is the size limitation?
  - There is no real limitation to the width and length. However, in case of very long chains, proper support is required for the track to bare the weight
- What will be the maintenance process? How it should be maintained? How frequently it should be maintained?
  - General maintenance would be to wipe with a dry cloth or duster. ShimmerScreen should not be treated with any cleaning products (any material). The yellow brass, aluminium and stainless steel can come in contact with fresh water since they will not rust
- Lead time for the supply – any disclaimers?
  - Standard lead time will be 5-6 weeks
- Will there be any colour co-ordination with tracks?
  - Track will be provided in silver / aluminium colour
- In case of chain breakage in between lengths, what is the solution?
  - We can extend the chain
- What is the composition of base metal?
  - Most of the finishes / plating are over carbon steel but plating can be done over yellow brass material too
- What will be the warranty of the product?
  - There will be no warranty of the product

**Thank you**
